Project Nimbus Zero-Trust Architecture Brief

Meridian Dynamics Inc. — Internal Document

Architecture Overview

a zero-trust security architecture rollout across all regional offices Project Nimbus is sponsored by Meera Krishnan and led by Anjali Krishnamurthy, with contributions from Tarun Sethi, Ishita Banerjee.

The architecture relies on Splunk SIEM, Okta SSO, Bitwarden Enterprise to enforce continuous verification of user and device identity before granting access to internal applications, replacing implicit trust for users on the corporate network.
